

## **FDRH Mission Statement as EPMA Institutional Member**

[The F.D. Roosevelt University Hospital with Policlinics in Banská Bystrica](#), Slovakia, (FDRH) decided to become an institutional member of EPMA for we find our visions of future healthcare development in very close agreement with the visions which EPMA presents since the very beginning of its activities in 2009. By our participation in EPMA we want to support EPMA's professional activities as well as we would like to contribute to the practical applications of predictive, preventive and personalized medicine (PPPM, or 3PM) at our hospital here in the Slovak Republic. We do hope that our team of medical professionals and other experts in the related fields, in a close international cooperation under EPMA's coordination, can accomplish the pioneering work and bring practical PPPM/3PM as close to the patient and caring-about-their-health individuals as possible. We would also like to encourage other medical facilities and organizations in Slovakia to join us so that we can coordinate our efforts in improving practical healthcare for all people.
