Hele Everaus has graduated from the University of Tartu (cum laude) in 1977. From 1978 up to now she has worked in the University of Tartu in different positions. She has worked as the Vice Rector for Institutional Development from 1998-2003.

Since 2000 up to now Hele Everaus is the head of the Hematology and Oncology Clinic of Tartu University and Tartu University Hospital.

Hele Everaus has founded bone marrow transplantation activities. She performed first bone marrow transplantation in Estonia and in Baltic countries in 1993. Hele Everaus has created blood bank reform and led long time Estonian Committee of Blood Transfusion.

Actually Hele Everaus is having the position of Head of Estonian Society of Tissue and Organ Transplantation and Estonian Society of Hematology. Beside medical and research activities she has been working on ethical issues. She is the head of Estonian National Ethics Committee and the member of Steering Committee Bioethics of Council of Europe. Research topics have been connected with pathogenetical aspects of malignancies, new opportunities for cell therapy in malignancies. Current project „Targeted therapy for malignant diseases“ is intimately connected with the personalized medicine approach.

Hele Everaus has organized hereditary cancer consultations in her clinic. International collaborations are very important for the further developments. Hele Everaus has had opportunity to pass professional training and have collaborations in Institute of Hematology of VIIth University of Paris, Hadassah University Hospital, Nebraska University Medical Center, Mayo Clinic, Helsinki University Hospital, Gothenburg University Hospital.
