

*Peter Kubatka*, Prof., Sc.D., Ph.D. is an experimental oncologist at Jessenius Faculty of Medicine in Martin, Comenius University in Bratislava, Slovak Republic. He graduated in Molecular Biology at the University of Pavol Jozef Safarik in Kosice (1997), Slovak Republic. In 2019 he became a University Professor. He has a particular interest in the breast carcinoma model *in vivo*. He evaluated the chemopreventive and therapeutic effectiveness and mechanism of anti-cancer action of retinoids, non-steroidal anti-inflammatory drugs, selective estrogen receptor modulators, aromatase inhibitors, antidiabetics, statins, different phyto-substances/plant-based functional foods, and melatonin in mentioned model. Professor Kubatka has authored or co-authored over 120 original manuscripts (Scopus, PubMed, or Web of Science core collection).
